- CATEGORY B
- CATEGORY C
- CATEGORY U
- TREE CONSTRAINTS
- SITE BOUNDARY

**Note:**  
Refer to the Tree Survey document for a detailed analysis of trees.

Tree Categorisations and Constraints follow guidelines contained with BS 58237 (2012).

The Tree Constraints outline is designed to provide a guide to potential root spread and the area in the vicinity of trees where any developmental impacts should be avoided. However natural or man-made obstructions may impede root spread therefore the Tree Constraints area should be considered a guide only. Crown spread may also be considered a constraint. In the event of works being undertaken within the Tree Constraints area then an on-site assessment by an arborist should be undertaken to determine root spread.
