Aighneacht: A Development Plan for a Sustainable Fingal

Comhairliúchán:

Draft Fingal County Development Plan 2023-2029

Circular Economy

Caibidil: Section 1: Written Statement» Chapter 7: Employment and Economy

The planning process should consider how consistent applications are with the transition to the circular economy and favour applications to enable sustainable production and consumption systems, the reduction of material and energy use, the reuse of objects and materials, etc. while discouraging resource intensive and linear economy processes.

In this regard, the proposal in the draft Plan for a demolition justification report is very welcome. (The plan should also make provision for other and wider circular economy analysis as referred to above.)
