

1. The Plan needs to be reviewed annually and a progress report issued preferably through the FPPN.
2. More importance needs to be given to Urban trees and Green space in Housing estates and new Developments
3. More Flowering Trees need to be planted as these act as Pollinators and aid Biodiversity
4. New Trees planted need better protection and maintenance
5. The aim should be not only on protecting our existing stock of Trees but increasing the Tree cover in Fingal.
