Subject: FW: Notice: Fingal Development Plan 2023-2029 - Commencement of Public Consultation on the Draft Plan

Hello,

Please see the below relating to commercial sea-fisheries and the draft Fingal development plan.

We welcome the support in the plan for the fishing industry. Commercial sea fishing is a long standing, pre-existing and traditional activity in the marine environment. It is essential that any negative impacts on fisheries are avoided. The evaluation of potential impacts on any commercial sea fishing activities needs to be given consideration as part of any planning/proposal process and during the development process itself. It is imperative that engagement should be sought with the fishing industry and other relevant stakeholders at as early a stage as possible to discuss any changes that may affect them to afford a chance for their input. Fishers' interests and livelihoods must be fully recognised, supported, and taken into account.

We note the plan supports the construction of offshore windfarms. In the event that offshore renewable energy installations (including offshore windfarms, tidal, and wave generators) are proposed, again the evaluation and consideration of potential impacts on any commercial sea fishing activities needs to be given consideration. It is essential that any negative impacts on fisheries are avoided. Again, stakeholders need to be consulted at as early a stage as possible and throughout the process to ensure fisher's livelihoods are supported.

Regards,
Environmental Co-ordination Unit
